

WATER EXCESS

June billing includes any excess over 80,000 gallons per year. Excess charges cover prior year.

*Rates for excess water consumes per 1,000 gallons:

| | | |
|-----------------------------|--------|-----------|
| First excess 40,000 gallons | \$1.45 | \$58.00 |
| Next excess 60,000 gallons | \$1.65 | \$99.00 |
| Next excess 100,000 gallons | \$1.85 | \$185.00 |
| Next excess 200,000 gallons | \$2.05 | \$410.00 |
| Next excess 400,000 gallons | \$2.25 | \$900.00 |
| Next excess 600,000 gallons | \$2.45 | \$1470.00 |
| Next excess 800,000 gallons | \$2.65 | \$2120.00 |
| Emergency water shutoff | | \$150.00 |

*For standard 3/4" meter only. For larger meters different rates apply.

Do you have a sprinkler system? Do you know how much water it uses?

While every sprinkler system is different, here are some water usage estimates that should really grab your attention! On average, each sprinkler zone uses approximately 15 gallons of water **per minute**. The table below shows just how water a sprinkler system could use in one month. ***These usage estimates are ONLY for the sprinkler system and do not include water used elsewhere in the household.***

| ZONE | Time (minutes) | x15 (gallons) | Gallons |
|-------------------------|----------------|---------------|------------|
| 1 | 10 | x15 | 150 |
| 2 | 10 | x15 | 150 |
| 3 | 10 | x15 | 150 |
| 4 | 10 | x15 | 150 |
| 5 | 10 | x15 | 150 |
| Totals per cycle | 50 | x15 | 750 |

If the system is used every other day, the monthly usage for the sprinkler system alone is calculated: 750 gallons per cycle time 15 days = 11,250 gallons
